PROJECTS

Event Management Web Application

- Developed an Industry level comprehensive Event Management System for Colleges to manage their overall duties in Arts Fests / Kalolsavam. Thereby College can use the application for event publishing, student registration, house-department classification, judging and valuation, result updating and tracking, appeal handling and revaluating, main result publishing etc. Originally the application is capable to do many advanced processes that help to handle entire procedures of the arts fest. Also, colleges can showcase their advancements as it is publicly hosted.
- Uses PDF libraries so that admin can utilize them to drastically reduce the paperwork which was a time-consuming factor before.
- Chess number generation is automated by this system ensuring unique and faster event enrollment.
- The secured nature of this system provides privacy to student's important data and secures the judgment process.
- Event Score will be lively updated as soon as the judge user submits it, this replaces any manual need of involvements by the admin and saves time.
- The system uses charts libraries to have A better UI & UX for visitors to view, track, analyze ongoing scores as in individual-wise, department-wise and house-wise.

Service Portal Web Application

[View Live](#)

- Developed a web application designed specifically for Akshaya Centers to showcase the various services they offer to the public, so that public could access the info and can also apply for certain services by filling and submitting dynamic forms.
- The portal is controlled by the admin of an already existing Centre Management System Software (CMS). The admin can edit almost all the info displayed at the portal such as offered services and their details, forms and their fields etc.
- Admin can notify an application's status to the public and public can track them using a unique track ID generated when the form is submitted.
- Built with focus on UX

TECHNICALSKILLS

- Programming Languages:**
 - ✓ PHP
- Backend Technologies:**
 - ✓ Laravel
 - ✓ Zend Framework
- Web Technologies:**
 - ✓ HTML5, CSS3
 - ✓ Material UI
 - ✓ Bootstrap
 - ✓ JavaScript
 - ✓ jQuery
- Database:**
 - ✓ MySQL
- Version Control:**
 - ✓ Git

ADDITIONALSKILLS/TOOLS

MVC | GitHub | Full stack Development
| RESTful API | SQL | UI/UX | Database
Design | UI Libraries |

SOFTSKILLS

Problem Solving | Communication |
Teamwork | Analytical Skill

EDUCATION

- B Voc Software Development**
Oct-2020 – Mar-2023
KSMDDB College Sasthamcotta,
Kerala University
- Higher Secondary Certificate**
2017-2019
MSHSS Mynagappally, Kollam,
Kerala (India)

WORK HISTORY

Junior Software Engineer

DecaSync Innovations Pvt Ltd |
Palarivattom, Kochi, Ernakulam,
Kerala (India)

November-2023- Present

Full Stack Developer

UniCentSoft | North Sooranadu,
Kollam , Kerala (India)

June-2023- Oct-2024
